Airocide - patented technology

Airocide technology is developed by NASA
Airocide device is ETL & CE approved
Environmentally friendly technology, does not
generate ozone.

airocide[®]
DEVELOPED BY NASA

AIROCIDE

eliminates 99,9987 % airborne impurities

airocide[®]
DEVELOPED BY NASA

- * In a closed environment bacteria, mold, fungi and viruses spread faster and ethylene hastens the aging of flowers and encouraging decay.
- * The Airocide in trailer cleans 99,9987 % of the air within one hour and destroys airborne bacteria, mold, fungi, viruses and ethylene.
- * Keeps the air clean during the transport.

 O. JYLHÄ OY

Airocide

The Best for Your Flowers

Airocide extends shelf life and time for sales and reduces losses.

Airocide extends vase life of cutflowers and duration of sensitive potplants dramatically

Flowers and pot plants will remain beautiful and fresh longer at home and customers are happier!
